

# Tubular Stripping & Crimping Machine

## WG-4R

### Features

- Integrated feeding, threading, stripping, twisting, and crimping for pre-insulated tubular terminals.
- Automatic adjustment of clamping pressure, stripping diameter/length, and crimping height.
- HMI interface with responsive pneumatic sensing controls and components.
- High-speed crimping with stable performance.

### Product Parameters

Model	WG-4R
Crimping Range	0.3-4mm <sup>2</sup> (max crimping length: 12mm)
Crimping Shape	Quadrilateral (square), customizable hexagonal shape
Stripping Length	Minimum jacket stripping length: 40mm
Production Efficiency	2.5 seconds / cycle
Rotary Blades	2 blades
Power Supply	AC 110 – 230V 50/60 Hz
Wight	150 kg
Dimension	1600*750*800 mm
